

The screenshot shows the Salesforce Lightning Setup Home page. The top navigation bar includes a blue cloud icon, the text "Home | Salesforce", and a search bar labeled "Search Setup". To the right are various setup icons and a user profile for "NITHISH KUMAR M" with options to "Settings" and "Log Out".

The main content area features a "SETUP Home" card with a "Get Started with Einstein Bots" section, which includes a cartoon bot icon and a "Get Started" button. Below this are sections for "Mobile Productivity", "Switch to Salesforce Classic", and "Add Username".

A sidebar on the left lists navigation links under categories like "Setup Home", "Service Setup Assistant", "Multi-Factor Authentication Assistant", "Release Updates", "Lightning Experience Transition Assistant", "Salesforce Mobile App", "Lightning Usage", and "Optimizer". Other sections include "ADMINISTRATION" (with "Users", "Data", and "Email" items), "PLATFORM TOOLS" (with "Subscription Management" and "Apps" items), and a "Most Recently Used" section showing "10 items".

**Step 1. Choose the field type** Step 1

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary ⓘ A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The

 Text Area (Rich)  
 Text (Encrypted)

You can create **rollup summary fields** on the master record to summarize the detail records. The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Allows users to enter up to 255 characters on separate lines.

Allows users to enter up to 131,072 characters on separate lines.

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

Allows users to enter any combination of letters and numbers and store them in encrypted form.

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label: Reschedule/Cancel Example: Account

Plural Label: Reschedule/Cancels Example: Accounts

Starts with vowel sound

The Object Name is used when referencing the object via the API.

Object Name: Reschedule\_Cancel Example: Account

This screenshot shows the Salesforce Setup interface for creating a new custom object. The main title is 'New Custom Object'. A message at the top states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles.' Below this, there are sections for 'Custom Object Definition' and 'Custom Object Information'. In the 'Custom Object Information' section, the 'Label' is set to 'Reschedule/Cancel' and the 'Plural Label' is set to 'Reschedule/Cancels'. There is also a checkbox for 'Starts with vowel sound'. At the bottom, it says 'The Object Name is used when referencing the object via the API.' and shows the 'Object Name' as 'Reschedule\_Cancel'. The interface includes a sidebar with links like 'Home', 'Administer', and 'Salesforce Mobile Quick Start', and a navigation bar at the bottom.

- Desktop Administration

**Step 1. Choose the field type** Step 1

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Checkbox Allows users to select a True (checked) or False (unchecked) value.

## Sharing Settings

Help for this Page ?

This page displays your organization's sharing settings. These settings specify the level of access your users have to each others' data. Go to [Background Jobs](#) to monitor the progress of a change to an organization-wide default or a parallel sharing recalculation.

Manage sharing settings for:

### Default Sharing Settings

**Organization-Wide Defaults**  Organization-Wide Defaults Help ?
